PROFESSIONAL SUMMARY

Data-Driven Fraud Analytics & Data Security Specialist with BSc in Information Security and leading cross-border threat detection across HK, Macau, and Chinese Mainland. Expert in Python, Splunk, Power BI, and Forcepoint DLP for high-volume log and CDR analysis. Collaborated directly with C-suite (CEO/CFO) and HKPF CCB to disrupt a HK$530K+ fraud scheme, cutting losses by 30%. Skilled in DLP monitoring, automated data pipelines, and strict PDPO/OFCA compliance.

EDUCATION

The Hong Kong Polytechnic University | Bachelor's degree in Information Security
09/2020 – 06/2022
Hong Kong Community College, The Hong Kong Polytechnic University | Associate's degree in Information Technology
09/2018 – 06/2020

WORK HISTORY

FRAUD AND DATA SECURITY OFFICER | 08/2025 to Current
Hutchison Telecom Hong Kong

1. Data Analytics, Visualization & BI Systems

- **Executive Dashboarding:** Built and optimized end-to-end Power BI dashboards integrating Forcepoint DLP controls and operational risk metrics, surfacing real-time threat insights directly to C-suite executives (CEO/CFO).
- **Log & SIEM Analytics**: Configured Splunk dashboards and automated alert mechanisms to analyze high-volume Call Detail Records (CDR) and system logs, accelerating threat detection and investigative workflows.
- **Pipeline Automation**: Developed Power Automate workflows to aggregate multi-source log data, eliminating manual reporting efforts and boosting processing speed by **20%**.

2. Pattern Recognition, Anomaly Detection & Insights

- **Time-Series Threat Detection:** Executed daily time-series analysis on CDR traffic to detect abnormal spikes; uncovered key evidence within 7 days, directly leading to the shutdown of a HK$530,000+ syndicated fraud ring in joint operation with HK Police Commercial Crime Bureau (CCB).
- **Transaction Trend Analysis:** Conducted quantitative risk analysis on telecom and payment gateway datasets (Global Payments), identifying malicious usage patterns and cutting overall fraud-related losses by 30%.
- **AML & Threat Modeling:** Operationalized Anti-Money Laundering (AML) anomaly detection models aligned with HKSAR regulatory frameworks, converting raw operational logs into structured compliance metrics.

3. Data Governance, DLP & Cross-Functional Security

- **Data Governance & Audit Liaison:** Governed enterprise data collection, analytics, and automated reporting workflows to guarantee strict compliance with HK regulatory frameworks (PDPO, OFCA, Competition Ordinance). Coordinated with and advised external auditors on automated data pipelines and continuous log monitoring systems, significantly accelerating external audit fieldwork and control validation cycles.
- **Data Lifecycle & DLP Security:** Designed encrypted data exchange pipelines using Python, PGP encryption, and Thales SFT for secure SIM provisioning and third-party vendor integrations, ensuring end-to-end data integrity.
- **Stakeholder Alignment:** Served as the central data liaison across IT, legal, and operational teams, translating complex risk requirements into unified security protocols and actionable compliance reporting.
- **Data-Driven Corporate Security & Loss Prevention:** Leveraged multi-source log analytics and predictive risk modeling to build real-time monitoring and automated audit pipelines, identifying physical-digital security anomalies and pre-empting internal fraud risks to keep operational losses at a near-zero level across cross-border offices.

PROGRAMMER | 10/2023 to 05/2024
Sonnet Business Systems Ltd.

Medical Systems & Office Automation
Delivered software solutions for healthcare clients, enhancing operational efficiency and data processing capabilities.

- Developed and tested office automation software and medical systems using Delphi, tailored to client medical requirements, resulting in a 30% increase in operational efficiency.
- Built data analysis tools integrating Delphi, Excel, and VBA to process medical sample data, streamlining reporting workflows and improving productivity by 30%.
- Conducted large-scale data analysis on over 1 million patient records using Microsoft SQL Server, supporting data-driven decision-making in healthcare operations.
- Provided ongoing technical support and maintenance for medical institution software systems, ensuring high availability and user satisfaction.
- Collaborated with external vendors and suppliers to enhance software functionality and integration, contributing to a 30% improvement in system performance.
- Customized medical report generation modules using Delphi, automating detailed clinical and operational reports and reducing manual effort by 30%.
- Documented development processes, version updates, and created comprehensive user manuals to facilitate software adoption and end-user training.

PROJECT ASSISTANT | 06/2022 to 02/2023
The Hong Kong Polytechnic University
Full-Stack Development & System Optimization
Led end-to-end development and optimization of web platforms, enhancing performance, usability, and security.

- Redesigned front-end UI with WordPress and Bootstrap, and restructured back-end database using MySQL, boosting user experience and system performance by 30%.
- Conducted User Acceptance Testing (UAT) with a focus on cross-platform responsiveness and compatibility.
- Configured infrastructure security protocols, reducing potential data and financial loss risks by 30%.
- Documented development progress and created user manuals for ongoing system support.

STUDENT ASSISTANT | 05/2021 to 08/2021
The Hong Kong Polytechnic University

- Analysed website traffic and user behaviour using Google Analytics, providing insights that improved content strategy efficiency by 30%.
- Performed A/B testing to optimise page layout and responsiveness across devices, increasing user engagement by 30%.
- Assisted in SEO marketing to boost organic search visibility.
- Developed and tested the official Finance Office website using Sitecore CMS, ensuring functionality met departmental requirements.
- Created user documentation for Google Analytics and Sitecore CMS to support team training.

SKILLS

- Big Data Analysis, Data Mining
- Digital Forensics, Logs Review and Monitoring
- DLP Forcepoint, Risk Assessment, Internal Audits
- Third Party Risk Management, Incident Response
- Chinese (Mandarin, Cantonese), English
- Office Automation
- Splunk, Thales Secure File Transfer, PGP Shredder
- Stakeholder Management
- SQL, Microsoft Office
